Subject: San Jacinto River Waste Pits

Gary,

I need to get some follow-up info on the sand mining operation at the SJRWP Site for a report back to the ATSDR regarding the status of the recommendations we made in our health assessment document. In the report (page 51 of the PHA document), we recommended that, "Efforts should be made to determine greater details of the sand mining operation, including when sands were mined from the area adjacent to the pits with respect to when wastes were disposed of in the pits, where mined sands have been distributed, and if possible, obtain sand samples for dioxin measurements."

Thank you,
Richard B.
